HEX: #ff0000

PANTONE Black C
CMYK: 0, 0, 0, 100
RGB: 0, 0, 0
HEX: #000000

Clear Space and Size Requirements

To enhance its visual effectiveness, proper margin (clear space) allowance around the RegistryPro logo must be maintained. The "x" height of the logotype was chosen as a standard unit of measure for calculating clear space and other size and positioning requirements. The logo should be separated on all sides from all other copy, photos, or illustrations by a clear margin area of at least two "x" height measurements as shown below. This guideline is a minimum; greater space is often desirable.

The logo is stringently proportioned. Under no condition can the relationship between the height and the width be changed.

When using the logo for print work, do not reduce the size smaller than .75 inches.

Please note that the color reproduced in this document may not match the pantone matching system.
